

IFC-1204L

Styrene-acrylic copolymer emulsion for both interior and exterior coatings

Technical Data Sheet

Name: IFC-1204L

Revision Date: 2023-07-17

Version:1.3

Product Description

IFC-1204L is a styrene-acrylic emulsion polymerized with organic silicon monomer. It is suitable for low PVC, middle PVC and high PVC latex coatings, including both interior and exterior. Also, as the excellent water resistance, excellent alkali resistance, excellent permeability and excellent pigments&fillers binding capacity of the coating film, IFC-1204L can be used for the general primer and colored primer.

Properties

1. Low MFFT, easy to adjust the coating the formula
2. APEO free, low VOC
3. Excellent water resistance and excellent alkali resistance
4. Excellent pigments&fillers binding capacity.

Characteristic data*

Property	Value	Unit
Appearance	Milk-white with blue phase latex	
Solid content	48±1	%
PH	7.0~9.0	
Viscosity	2000~6000	cps(25°C,3#,12r/m)
MFFT	25	°C
Tg	20	°C

*These properties are typical but do not constitute specifications.

Storage

The product should be stored in dry condition between 5~35°C with the integrity of the packaging, and prevented from direct sunlight. The validity of this product is for 12 months, performance assessment is recommended before use after shelf life. The product should be protected from freezing during storage. It is suggested to filter before application and use up once the package is open.

IFC-1204L

Disclaimer

Foshan Shunde Infinechem Co., Ltd. recommends that customers should check with Materials Safety Data Sheet (MSDS) for details about safety instructions. We also suggest that you contact the suppliers of other materials used in our recommended formulations and consult appropriate health and safety regulations prior to use.
